

Scavenger hunt for patterns in nature.

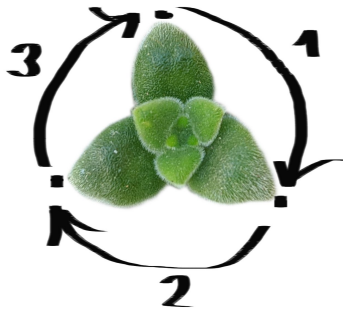

On my walk around Chelsea Physic Garden I found these patterns in nature.

How many of the following patterns can you find on your next walk around your garden or through the park?

Cross them off as you find them.

Something with mirror symmetry

Something with 3 fold rotational symmetry

Something with 4 fold rotational symmetry

Something with 5 fold rotational symmetry

Something with 6 fold rotational symmetry

Something with rotational symmetry of an order larger than 6

A spiral

A fractal pattern
